## Experience

### Software Engineer (Drupal) at Altium d.o.o. Beograd - Novi Beograd

Beograd, Serbia **May 2024 – Present**

### Software Engineer at Derivative

Novi Sad, Serbia. (Contract, Remote)
**Oct 2022 – Present**

I'm a part of the web development team and responsible for a website development, website migration to a new platform and CI/CD automation.

Skills: Amazon Web Services (AWS), PHP, Drupal, MySQL

### Software Engineer at Slaight Music

Saint Petersburg, Russia (Part-time, Remote)
**Nov 2018 – Sep 2022**

I was responsible for a different websites and web services development and maintenance.

- We migrated RockPeaks site from the Drupal 6 to the headless Drupal 8 + React.js/Next.js.
- I have maintained plug-in for a Plex Media Server to integrate with a RockPeaks site user library to fetch metadata.
- I have developed an NFT smart contracts built on top of FLOW blockchain and integrated with a Dapper Wallet.
- I maintained AWS infrastructure to provide a CI/CD for Drupal and Next.js.
- We have migrated several Drupal 7 sites to Drupal 8/9.
- I have built several integrations with a 3rd-party service, like Plex, Youtube, Dropbox etc.

Skills: PHP, MySQL, Drupal, NodeJs, Python, React, GraphQL, Docker, Amazon Web Services (AWS)

## Chief Technology Officer at CimpleO

Omsk, Russia (Full-time)
**Jun 2014 – Dec 2018**

As a CTO I was responsible for interviewing and hiring new employees. I worked on gathering project details, interpretation of business requirements into development requirements and projects estimation. I managed most of the projects and provided mentorship for the teammates.

- I led a team of 8-12 people.
- We run several projects and contributed to several Drupal modules.
- I prototyped an IoT app for iOS built on top of React Native, and built a backend based on MQTT protocol using Mosquitto (there is an example repo that was a setup core).
- I extended the functionality of the online system of appointment scheduling for the AFC Urgent Care Portland clinics built on top of the new version of the https://www.clockwisemd.com API, and made it embeddable anywhere on the site.

Skills: Leadership, Project Management, Mentorship, PHP, MySQL, Drupal 7/8, Node.js, Docker

## Developer at BurningButtons

Omsk, Russia (Freelance)
**Jul 2013 – May 2014**

As a full stack developer I developed websites mostly using Drupal 7 and JavaScript via Upwork (formerly oDesk).

Skills: PHP, MySQL, Drupal 7, JavaScript, CSS/HTML, Node.js

## Developer at Qliff

Omsk, Russia (Full-time)
**Jun 2010 – Aug 2013**

Web development, mostly Drupal 7 via Upwork (formerly oDesk).

Skills: PHP, MySQL, Drupal 6/7, JavaScript, CSS/HTML

# Education

2004 - 2009, Omsk State Technical University (OSTU), Engineer's degree
